

ISK-SODEX MASTERS' LEAGUE

Kadir İSA

Masters' League Moderator

You may have a class A product but if its installation and operation are not top class then the fact that your product is of good quality means nothing. In this respect this competition was important for me because this competition was like a laboratory test allowing us to evaluate the advantages and disadvantages, and so we might be able to reshape sector-based events accordingly, which is important. This was a topic I always lamented at trade fairs abroad thinking why don't we organize skill competitions in our country. When I heard that this kind of competition was going to take place I got very excited, and even though it was the first of its kind here I think there were minimum number of setbacks. In fact, I would not be lying if I said we encountered no setbacks. In that respect, the judges and all the people from the sound crew to the set crew and the people working behind the scenes all put in a lot of effort. I want to set the goal here as participation in international skill competitions. Let the experience we learn from this and future competitions allow us to take part in the Euro Skills and World Skills competitions. In order to do this we need to make a few tiny revisions but other than that our technicians are very talented. We all saw this over the three days of competition. I want to thank the organizer, the supporting sponsors and all the judges and assisting personnel who provided their unwavering support during the competition.

Ingried GERBER

Rothenberger – Technical Instructor

Hello, nice to meet you, I'm Ingried and I come from Germany, from Rothenberger and it's very exciting for me to see SODEX fair in Istanbul. We have a test here and the plumber and the worker, they are very strong in the work to fix the radiator to create a treating with machine, they are very near by the work that's very wonderful to see them and we look for the result. And that's great.

Ömer Faruk CİCİ

Masters' League 3rd Prize

Thank you very much. You believed in us and you prepared such a program as this one. We really liked this program, of course, and the excitement was a bit overwhelming. And with all this excitement we tried to do the best we could. In the middle of all this excitement, you awarded us a prize. This is a fine thing for technicians. Of course, we technicians aren't very good with words. It is hard for us to express ourselves. I want to thank SODEX and our sponsors for believing in us. We expect to see more of this. There's bound to be other valued professionals apart from us. They are also going to be seen thanks to you.

Metin ÖZTÜRK

Masters' League 2nd Prize

Honestly, it was a great competition. Just taking part was a pleasure in itself. And receiving a prize at the end was the icing on the cake. Thank you very much.

Ahmet SANCAK

Masters' League Winner

This is the first time such an event has been organized in Turkey and it was a joy to take part in it. Throughout the competition we received your assistance and tremendous support from the participants and the sponsors. I mean, so much can be said about the fair and the competition and the reason is that Turkey needed this competition. We were able to see our mistakes and we shouldn't repeat them because it is the people who reside in apartments, meaning the users, who suffer because of them. I hope there are more competitions like this which allow us to recognize our mistakes. I mean, it was an amazing competition.
